Vendor 2 — PrimeDesk Systems

Position

Technically excellent but commercially dangerous

Proposal

PrimeDesk provides an enterprise-grade customer support platform with omnichannel ticketing, AI-assisted routing, advanced reporting, workflow automation, REST APIs, webhooks and SSO integration.

Implementation

"Core platform deployment can be completed within 5 weeks."

However:

"Customer-specific API integration and migration activities may require an additional 4–6 weeks."

Pricing

Component	**Amount**
Platform license	₹5,20,000
Implementation	₹1,80,000
Migration	₹70,000
Subtotal	**₹7,70,000**

The proposal additionally states:

"API integration services are charged separately at ₹75,000 per integration."

The customer is expected to require two integrations.

Potential Year 1 cost therefore becomes:

₹9,20,000

Support

24 months of support included.

API

API capability is fully confirmed.

SLA

PrimeDesk provides:

99.95% availability SLA

with defined response times.

Contract Risk

"Annual license fees may increase by up to 12% upon renewal."

Expected characteristics

- Budget: ✅ PASS if required integrations are correctly included
- Timeline: ⚠ **REQUIRES REVIEW**
- Support: ✅ PASS
- API: ✅ PASS
- SLA: ✅ PASS
- Technical Fit: Very High
- Risk: Medium/High

Edge case

The vendor advertises **5 weeks**, but the actual integration requirement can add **4–6 weeks**.

Your system must not blindly extract "5 weeks" and declare PASS.
