Vendor 6 — ServiceNova Labs

I'm adding a sixth vendor because this makes your test considerably stronger.

Position

Borderline vendor designed to test exact thresholds and scoring sensitivity

Implementation

8 weeks

Pricing

₹9,99,999

Support

12 months

API

"REST API integration is included."

SLA

99.9% uptime commitment

Technical capability

The platform supports:

- Ticket management
- Customer portal
- Reporting
- Workflow automation
- REST API
- Webhooks
- Role-based access
- SSO

Risk

The contract contains:

"Support coverage applies during standard business hours."

Critical incidents are handled during business hours only.

The proposal does not provide 24×7 critical incident response.

Expected characteristics

- Budget: ✅ PASS — **₹1 below threshold**
- Timeline: ✅ PASS — **exactly 8 weeks**
- Support: ✅ PASS — **exactly 12 months**
- API: ✅ PASS
- SLA: ⚠ **REQUIRES REVIEW**
- Technical Fit: High
- Risk: Medium

🔥 **Edge cases**

This vendor is specifically designed to test:

₹9,99,999 vs ₹10,00,000

and

8 weeks exactly

and

12 months exactly

Your comparison logic should not accidentally treat these as failures.
